

## EVG FILZMOSER RA-XE 16/5

Machine for straightening and cutting of steel wire in coils, equipped with rotors of straightening with hyperbolically shaped straightening rolls. The machine is equipped with 5 rotors of different diameters for wire  $\varnothing$  8,  $\varnothing$  10,  $\varnothing$  12 and 16  $\varnothing$ .

### Technical specifications

Straightening speeds				
Wire diameter (mm)	8	10	12	16
Maximum speed (m/min)	130	140	120	95
Average speed (m/min)	100	100	95	85

- **Manufacturing year:** 2004
- **Cutting lengths:** from 0.5 m to 12 m.
- **Cutting tolerance:**  $\pm 0.5$  mm.
- **Alignment:** 0.3d, maximum 3 mm per meter.
- **Automatic mandrel change:** includes 3 mandrel sizes (32 mm, 48 mm, 64 mm).
- **DBE bending device:** with two independent heads, ideal for the production of hooks and stirrups.
- **Production flexibility:** very high, suitable for frequent diameter and shape changes.
